

Solvent-free Products Diver-cote™ Underwater Applications

ECO Friendly

This product has been designed to be applied underwater; for above and below splash zone and for repair of jetties, pilings and other steel and concrete subsea structures.

- Ideal corrosion protection for large submerged structures
- No paint dispersion in water for eco friendly application; producing faster and cleaner applications
- Forms a very smooth, non-porous, paint-like finish
- High application rates can be achieved for large areas using power brush/roller
- Excellent abrasion and erosion resistance and can withstand severe physical stresses caused by wave action
- Cost effective solution compared to expensive cofferdam or other methods of underwater application
- Offers excellent adhesion to substandard surface preparation expected underwater
- Offers long-term maintenance-free protection
