

Potable Water System

Utilising unique solvent-free, wet & rust tolerant technology

For Marine & Industrial Applications

Our potable water system is made up of two ground-breaking epoxy coatings:

Epo-chem™ RS 500P & RA 500M

Certified to
NSF/ANSI 61-G

System Properties:

- Tested and Certified by NSF International and FDA Approved for potable water applications
- Unique, solvent-free, wet & rust tolerant primer
- Solvent-free, wet tolerant, glassflake reinforced topcoat
- Flexibility on surface preparation method (abrasive blast, water jetting or mechanical)
- Ideal for tank lining or confined spaces
- No requirements for dehumidification or ventilation
- Unlimited over-coating intervals
- Hot work (e.g. welding, grinding, etc.) can be carried out without interruption
- Reduced H&S and Fire Precaution

This system has been used extensively in the following types of vessel:

- Cruise Ships
- Tankers
- Refrigeration Vessels
- Container Ships
- Offshore Supply Vessels
- Deep Sea Fishing Trawlers
