

Chem-glide™ RA 500CG Foul Release Hull Coating

Unique solvent-free, wet tolerant technology

Chem-glide™ RA 500CG is a **solvent-free, wet tolerant**, non-stick, non-toxic, scrubbable coating

System Benefits:

- **Solvent-free** (odourless)
- Contains no solvents, biocides or harmful chemicals and there is no release of any ingredient
- Exceptional abrasion and impact resistance offering long-term maintenance-free protection
- Non-stick, scrubbable coating which does not provide support for marine growth
- Designed for long-term hull protection as an alternative to anti-fouling coatings
- Glassflake properties provide a tough, impermeable barrier
- Outstanding **wet tolerant** properties
- Extremely smooth surface with high flexibility
- Ease of maintenance and repair
- Ideally, **Epo-chem™ RS 500P solvent-free** primer should be utilised as a once only base coat
