

Swimming Pool Coatings

For Marine & Industrial Applications

Our swimming pool coating system comprises of two products offering an innovative **solvent-free, wet & rust tolerant** solution:

- **Epo-chem™ RS 500P (Primer)**
- **Epo-chem™ RA 500M (Topcoat)**

This revolutionary system offers long-term **maintenance-free** performance. The unique capabilities of these products allow any surface preparation method to be utilised prior to coating application. This is particularly useful due to the fact that in many refurbishment projects grit blasting is not permissible.

The **solvent-free** nature of these products also allow other work within the vicinity (including hot work) to continue without disruption, offering our customers substantial time and cost savings, especially during dry docking.

System Benefits:

- **Solvent-free**
- **Wet & rust tolerant**
- Quick and easy refurbishment
- No disruption to standard vessel operations
- Other work (including hot work) can continue nearby without disruption
- Significantly reduced H&S and Fire Hazard
- No grit blasting requirements
- No humidity or dew point restrictions
- No recoating limitations (ease of repair)
- Smooth, seamless and aesthetically-pleasing finish
- Troublesome tile-based systems can be replaced with ease
- Exceptional chlorine resistance
- Long-term **maintenance-free** performance
