

<b>Client:</b> <i>Yeoman Group / V. Ships</i>	<b>Industry:</b> <i>Marine</i>
<b>Vessel:</b> <i>Yeoman Bontrup</i>	<b>Date:</b> <i>October 2011</i>
<b>Location:</b> <i>Poland</i>	<b>Product:</b> <i>Epo-chem™ RS 500P</i>

## Overview

In 2010 the Yeoman Bontrup caught fire resulting in **1/3 of the ship's structure being destroyed**. Due to the unique structure of this vessel, the owners decided that they would like to rebuild the areas which were affected by the fire. Over 30,000m<sup>2</sup> had to be recoated; including the conveyor belt area, pipe tunnels, corridors and elevators.

## Challenge

The client required a coating system which could be applied whilst hot work and other trades were also being carried out nearby simultaneously. The client was looking for a coating system which could be applied in the cold wintry conditions.

## Solution

Major time and cost savings could be achieved by utilising **Chemco's** one coat **solvent-free** solution as opposed to the standard two coat solvent-based system offered by major paint companies. The surfaces were abrasive blasted to a minimum Sa 1 standard, followed by one coat of **solvent-free, wet & rust tolerant Epo-chem™ RS 500P**, offering 10 years plus life expectancy.

## Outcome

By utilising **Chemco solvent-free** solution, coating application could be undertaken during the rebuilding programme, whilst conventional systems would require the rebuilding programme to be complete before they could be applied. This significantly reduced the overall project duration resulting in huge time and cost savings.

## Benefits

- Solvent-free
- No humidity or dew point restrictions
- No disruption to other ongoing work in the vicinity
- Reduced H&S and Fire Precaution issues
- No over-coating limitations
- Substantial time and cost savings
- Can be applied in cold wintry conditions

Solvent-free • Water-based • Wet-tolerant

• Rust-tolerant • Zero VOC

• Tank & Pipe Linings • Under-water & Marine • Glassflake

• Rust Converters & Primers • Ceramic & Metal Repair • Anti-static, Conductive & Anti-slip Flooring

• Approved for Contact with Food, Drinking Water & Beverages • Damp or Green Concrete Primers

• Concrete Repair Systems • Elastomeric System

• High Temperature Systems • Fire Retardant • Insulation Systems
